ABOUT THAT CHINESE WALL

FACTS WHICH IT WOULD BE WELL FOR FREE-TRADERS TO DIGEST.

THE DELPHIC UTTERANCES OF STATESMAN

-MARKETS OF THE

[BY TELEGRAPH TO THE TRIBUNE.]

Washington, April 7 .- When the Tariff law of 1890 was enacted the free-trade leaders in Conwith some vehemence and considerable vocifers, as well as with the utmost confidence, that the Republican party had raised "the Chinese wall of protection" so high that not only and foreign goods be excluded from the maralarming degree; and they drew weirdly prophetic and wefully pathetic pictures in the eground of which were seen empty wareport towns of the United States as they would

en turned up in London at a free-trade et of prophecy was still upon him. He not markets of the world." He seemed to intimate that the Englishman was likely to find the Vankee a pretty tough customer in this compe

ent which is printed, but not now pubhas not yet begun-in fact, he would no indication that it ever will begin under free-trade leadership—but he would be gratified to discover that the free and unobstructed inflow of foreign goods through that "breach in the Chinese wall of protection" has not only begun, but is rapidly increasing in force and volume. In other words, he was half right.

According to the January summary, the imports during the seven months since July 1, 1894—five of which were since the enactment of the Wilson-Brice-Gorman law—amounted to \$407,000.

for the conquest of "the markets of the " was moving in the wrong direction and

96, the total for 1830, the last full year under the tariff of 1883, amounted to 57, the total for 92 amounted to 116, that for 1853 to 35 and that at 1855 to 59. At the present rate the total for 935, under the new tariff, will amount to

A NEW TEST OF CHEMICAL PURITY.

WHAT THE TEMPERATURE OF THE "CRITICAL POINT" CAN BE MADE TO REVEAL

In chemistry and the industries there is no problem more important than the purification of sebstances. A number of rare metals have been discovered as impurities of more common metals. All
mpurity affects the physical, chemical and physioogical qualities, and at the same time the comnercial value, of a substance. In pharmacy and in
the perfumery trade a sure method of detecting
ducteration would be of inestimable value. More
han once we have referred to this problem and the
nore or less approximate methods that one has at
is disposal for the determination of particular cases.
I Rhoul Placet, who has fiquefied oxygen, and
andles with extreme skill most unusual degrees of
old and enormous pressures, proposes to utilize
arrations in the temperature of the "critical point"
of iguide for the purpose of ascertaining their imarrity. It is well known what the bolling tempera-Translated from Le Monde Illustré.
